DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 24, 26, 29, 33, 34, 37, 39-42, 46, 66, 68, 72-75, 77-80 and 84 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuwabara (USPN 5967402).

Kuwabara teaches a method of forming a weld joint comprising disposing a sealant on at least one Al member (claims 2 and 3) such that it fills the interface, initiating an exothermic reaction in the sealant such that the sealant seals the interface between the faying surfaces and joining the members to form a sealed joint (abstract , figure 3 and col 5 lines 54-67). The sealant comprises a fluid and plasticizer (binder) (col 3 lines 1-25). The sealant is heated to an initiation temperature (col 5 lines 6-20). A braze material comprising Ni is used (col 6 lines 59-67). Parts are urged together during bonding (col 3 lines 55-65).

Response to Arguments

3. It is noted that no arguments were made relative to Kuwabara. Therefore the 102 rejection of claims 24, 26, 29, 33, 34, 37, 39-42 and 46 as anticipated by Kuwabara stands and includes new claims 66, 68, 72-75, 77-80 and 84.

Allowable Subject Matter

4. Claims 1-23 are allowed.
5. Claims 25, 27, 28, 30-32, 35, 36, 38, 43-45, 67, 69-71, 76 and 81-83 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knopp et al.(USPN 3899306, joining step, exothermic coating), Hardwick (USPN 5242098, joining step, exothermic coating), Cowan et al. (USPN 3233312, joining step, exothermic coating), and Weihs et al.(USPN 6534194 B2).
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1725

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
